

I am 77 years old and walk with a walker. I should not have to try and get to the telephone only to find it is another telemarketer on the other end of the line. If I don't want to receive telemarketing calls, then I shouldn't have to. It is ashame that you can't even rest in your own home when the calls begin at 8:00 a.m. and they don't let up until 9:00 p.m. I feel that something has got to be done to protect the public from such harassment.
